Message From Active President

International Medical School provides excellence in every sphere of education. We always provide the best education and facilities to our students to facilitate their overall development. Studying IMS is one of exposure and rich local culture. We have integrated a high level of technology and media resources with our curriculum to provide wholesome knowledge to our students. We are imparting not medical education but also inculcating the professionalism required in doctor. At IMS we follow international standards of education and curriculum designed and approved by leading academicians and medical professionals which help in our international students to be at par with their medical counterparts in respective nations. Apart from educational excellence the IMS campus is the second home for students coming from multiple nationalities. For us every student is part of our IMS family.

– Seralin Galimbek Adibekovich

Active President of UIB

Vice Rector for Internationalization

Dear Students & Parents, Greetings from International Medical School, Almaty, Kazakhstan. We are inviting you to join Medical Education in our university, which is one of the most interesting & Noble Profession in the world. Dear Parents, I am aware of your hard work, that you have done everything to your child to become a successful Doctor. I also understand that, how you have arranged the fees for your child's education. So, I am hereby to assure you that, I will be helping your children to achieving their dream. Personally, I will take care of all students here. I will work day & night to make their study smooth and make their life easy & comfortable in Kazakhstan. I will take every step to provide them good & advanced education as per world standards. Dear Students, in my opinion Degree is only a piece of paper, if you don't acquire knowledge during your study. Don't forget after your degree, you will be treating the patients in your home country, and for a patient, Doctor is equal to God. Their lives will be on your hand, and it's a big responsibility. In our Medical School we provide "Smart Medicine" program, which is designed to give more clinical knowledge.

-Sheikh Farooq
