MANUFACTURER & SUPPLIER OF EXTRA NEUTRAL ALCOHOL & ETHANOL

[Know More](#)

About YND Industries

Our alcohol teams have been dedicated to producing quality ethanol from natural ingredients by fermentation of sugars and starches. The sugars are derived mainly from molasses and grain. After the fermentation process, the ethanol is purified by a multiple distillation and rectification process. Our product features constant pure quality and is consequently an essential and value-adding raw material for the industrial sector.

We are able to supply the highest quality and do so consistently. Besides adhering to strict quality standards, we can also filter pure ethanol according to special micron filter requirements on demand.
