Testing UI using the creation of automated functional test cases.

SEO Optimization for B2C Websites

The strategies and tactics, necessary to achieve visibility in search results.

What Client Say About Us

I've had the opportunity of working directly with Piyush to experience his breadth of technical knowledge and his ability to handle and solve issues. When dealing with development projects, there isn't a more satisfying feeling than being able to spot a need or problem and being able to blindly dump it on someone that you know will run with it and get it sorted out. That's Piyush. Oh, he's also nice.

Carli Davila

Having Piyush within the development of our platform has been incredible, always finding solutions to all the requirements that we request from different departments. He is someone who, beyond solving, also suggests optimizations and ways that are different from what one proposes. He has been involved in the PRoduce project since its birth and is one of the main factors that have allowed our growth.

Patricio Schames
